

etree.org

NEVER PAY \$\$\$ FOR BOOTLEGS!

Bands that allow their fans to tape and trade their concerts also *forbid* those recordings from being sold. Etree.org is a community of fans that distribute the highest possible quality audio via the Internet for FREE!

What is etree.org?

Etree.org is an Internet community committed to providing the highest quality live concerts in a lossless downloadable format. You can find every band that allows taping in the jambands community on etree.org, including **Phish**, the **Grateful Dead**, **String Cheese Incident**, **The Slip**, **Medeski, Martin & Wood**, **Umphey's McGee**, **The Big Wu**, **Amphibian** and **The New Deal**.

To use Etree.org, all you need is a high speed Internet connection (cable modem, xDSL, T1, or Ethernet) and a CD burner. Etree.org uses Shorten (.shn) audio compression because it creates an exact clone of the original DAT source. We do not use MP3 due to it's lossy compression scheme which greatly degrades the quality of the music.

If you trade a CD-R burned from MP3 audio, you're polluting the CD-R trading community. Etree.org gives everyone the means to create and trade music with no loss of quality. Best of all, it's **FREE!**

<http://etree.org>

Because Bouncin'
sounds even
worse on MP3
